Subject: Microsoft Settlement

The proposed Microsoft settlement is a fair and equitable solution particularly for those states that are holding out.

From my perspective it would appear that the remaining nine states are using the Federal Government to tilt what was already level playing field. Its time to stop using our tax dollars to eliminate competition for those companies that haven't been able to cut it in the marketplace.

Microsoft has done a great job in product development and support. I recently received top notch technical support from Microsoft for an extinct operating system. I Also use Corel's Wordperfect, and they won't even talk to me because it isn't the latest version.

The proposal should be approved for all states.
